DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statements submitted on 12/26/2000 and 6/5/2001 have been considered by the examiner.

Specification

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-4, 8-12, 19 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps. It is unclear how the listed steps could authorize a sender.
5. Claims 5-7 and 13-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
6. The term "sufficiently" in claims 5-7 and 13-18 is a relative term, which renders the claims indefinite. The term "sufficiently" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. Claim 6

Art Unit: 2134

seems to try and define sufficiently, but all it does is say that x bits out of y must be the same. It does not however specify that x is greater than 0, or less than y, and thus leaves the definition of sufficiently unclear. The specification gives an example of 20 bits, but it is unclear if this is meant as a limitation or an example.

7. Claims 1-20, as best understood, are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The claims do not explain how the sender is going to generate a number that's hash sufficiently matches the hashed N1, or how it might generate a number that's hash sufficiently matches the hashed timestamp. This seems to be the base of applicant's invention, yet the claims give no description of how it is to be achieved.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1, 2, 8-12, 19 and 20, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Menezes et al., in Handbook of Applied Cryptography.

With regard to claims 1, 2, 8-12, 19 and 20, Menezes discloses authenticating a user (pages 397-405 section 10.3) by sending a hash of a number (a random number is a hash of a seed) and receiving a response from the user.

Allowable Subject Matter

10. Claims 5-7 and 13-18, as best understood, would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
